Darek SP6NVK reports -
In service HAM in Google (www.hamatlas.eu/Gg/KML_en.htm) in www.hamatlas.eu I added new service QTH Locators Viewer. It's the whole World's locators grid as overlay in Google Earth. You can see where your antenna is. [SP6NVK]

>From 9Q to A6:
Dear friends
After a 5 years long stay in 9Q, Democratic Republic of Congo, my moving to the United arab Emirates is now confirmed. I hope to be there in next September. I?ve already apply for an A6 licence and, instead of the difficulties, I hope to get it. Even if my traffic is made in French language, anyone can contact me from 40 to 10m and even 6m. However and according this approximative schedule, I?m daily and mainly on 20m SSB between 0700 and 0800 utc, in the low part of the ssb bandplan and in the afternoon between 15:00 to 16:00 utc on 21.188. In the evening I?m between 40-10m according to the propagation. Be patient, i?ve only 100w and no directive antenna. No place now for 160 and 80 which antennas had been dismantled. Sked are always possible (see QRZ.com). No Internet at home only at work so my private mail is read before Service, while the lunch break, and after 16.30 utc. Answers as soon as possible, according my job timetable.
Au plaisir de se retrouver sur l'air
